

GP Lecture Preparation Notes

1. Types of Leadership and Their Characteristics

a. Autocratic Leadership

- Centralized control, decisions made by leader alone, little input from team members.
- Example: Military or emergency situations.

b. Democratic Leadership

- Leader involves team in decision-making, encourages participation, values feedback.
- Example: Project teams, educational settings.

c. Laissez-Faire Leadership

- Minimal interference from leader, team members make decisions independently.
- Example: Creative industries, R&D teams.

d. Transformational Leadership

- Inspires and motivates, focuses on vision, change-oriented.
- Example: Start-ups, innovation-driven organizations.

e. Transactional Leadership

- Focuses on tasks, rewards/punishments, short-term goals.
- Example: Sales teams, operations management.

2. Motivational Theories (6)

1) Maslow's Hierarchy of Needs

- Five levels: Physiological, Safety, Love/Belonging, Esteem, Self-Actualization.

GP Lecture Preparation Notes

2) Herzberg's Two-Factor Theory

- Hygiene Factors (e.g., salary) prevent dissatisfaction.
- Motivators (e.g., recognition) drive satisfaction.

3) McGregor's Theory X and Theory Y

- Theory X: People dislike work, need control.
- Theory Y: People enjoy work, are self-motivated.

4) Alderfer's ERG Theory

- Needs: Existence, Relatedness, Growth.

5) McClelland's Theory of Needs

- Focus: Achievement, Affiliation, Power.

6) Vroom's Expectancy Theory

- $\text{Motivation} = \text{Expectancy} \times \text{Instrumentality} \times \text{Valence}$.

3. Maslow's Need-Hierarchy Theory

A pyramid with five levels:

1. Physiological needs: Food, water, shelter.
2. Safety needs: Security, stability.
3. Love/Belonging: Friendships, relationships.
4. Esteem needs: Recognition, respect.

GP Lecture Preparation Notes

5. Self-actualization: Achieving full potential, creativity.

Progression: Lower-level needs must be satisfied before higher-level needs become motivational.

4. Team Building

Definition: The process of turning a group of individuals into a cohesive team to achieve common goals.

Stages (Tuckman's Model):

1. Forming: Team members get to know each other.
2. Storming: Conflicts arise as roles are defined.
3. Norming: Team begins to work together.
4. Performing: Team operates efficiently toward goals.
5. Adjourning: Completion of task and disbandment.

Key Elements:

- Clear goals
- Defined roles
- Open communication
- Trust and respect
- Conflict resolution
