Title of Lab exercise-IV: Time Management: Use of Time Management tools.

Objective of the exercise: Students should be able to learn time management techniques and tools.

Preamble of the exercise:

Time Management is the process of planning and exercising conscious control of time spent on specific activities, especially to increase effectiveness, efficiency, and productivity. It involves juggling acts of various demands upon a person relating to work, social life, family, hobbies, personal interests and commitments with the finiteness of time. Using time effectively gives the person a “choice” to spend/manage activities at their own time and expediency. Time management may be aided by a range of skills, tools, and techniques used to manage time when accomplishing specific tasks, projects, and goals complying with a due date. Initially, time management referred to just business or work activities, but eventually the term broadened to include personal activities as well.

Implementation of goals:

The major themes arising from the literature on time management include the following:

- Creating an environment conducive to effectiveness
- Setting of priorities
- The related process of reduction of time spent on non-priorities

Benefits of Time Management:

The ability to manage your time effectively is important. Good time management leads to improved efficiency and productivity, less stress, and more success in life.

Here are some benefits of managing time effectively:

1. Stress relief Making and following a task schedule reduces anxiety. As you check off items on your “to do” list, you can see that you are making tangible progress. This helps you avoid feeling stressed out with worry about whether you’re getting things done.
2. More time, good time management gives you extra time to spend on your daily life. People who can manage time effectively enjoy having more time to spend on hobbies or other personal pursuits.
3. More opportunities Managing time well leads to more opportunities and less time wasted on trivial activities. Good time management skills are key qualities that employers look for. The ability to prioritize and schedule work is extremely desirable for any organization.
4. Ability to realize goals. Individuals who practice good time management can better achieve goals and objectives, and to do so in a shorter length of time.

Techniques/tools and guidelines towards effective time management is outlined at

<https://www.usa.edu/blog/time-management-techniques/>

Guidelines for the conduct of the exercise:

1. This exercise to be performed individually.
2. List down the 10 ways that you can use to improve time management skills and increase productivity.
3. Design strategies for the time management to accomplish action plan chartered for the short term and long-term goals decided during exercise 02 of GP-1.
4. Evaluate the time spent on social media (reels, shorts etc) and decide upon constructive strategies to mitigate these distractions.
4. Exploration of AI based time management tool.
5. Summarize the learning and outcome of this exercise with an appropriate brief write-up with the above-mentioned guideline points.

CO-PO Mapping strength and Justification:

CO	PO	CO-PO mapping strength	Mapping Justification
Evaluate time management skills	PO 12	3	Effective time management is referred to be the key towards success and learning effectively. With acquainting these techniques serve the development of personal attributes to be used for personal and professional life. This qualifies it to be mapped strongly to lifelong learning (PO-12)

Evaluation Guidelines/Parameters:

1. Individual evaluation,
2. Evaluation of time management techniques
3. Example time management and planning for action plans for short term and long term goals
4. Reflection of time management in using social media and strategy for it's constructive use.
5. Brief report on student's exercise.
