

Name: Abhishek Anil Patil

Roll No.: 08

Class: AIML-A

PRN: 12414243

1. With reference to the assignment no 1 (review of reference SCI/ Scopus paper, area of interest), search Indian/abroad patents published/granted in that area and review few (2-3) patents and summarize the central idea of the patent.

Patent Search and Review Based on Area of Interest (Medication Tracking / Digital Health)

Patent 1:

Title: Medication adherence monitoring system

Patent Number: US10176510B2

Country: United States

Granted On: January 8, 2019

Summary of Idea:

This system monitors a patient's medication adherence using a combination of sensors and a cloud-based system. The pill bottle has an embedded sensor to detect when it's opened. The system tracks this data and notifies caregivers via a smartphone app if a dose is missed.

- **Relevance to DawaTrack:** Similar focus on ensuring timely medication intake using digital alerts and user tracking.

Patent 2:

Title: System and method for managing medication adherence using reminders and analytics

Patent Number: IN202011020192 (Indian Patent)

Country: India

Published On: December 2020

Summary of Idea:

The patent outlines a system that integrates reminder systems with health analytics. Users receive automated alerts for medication intake. The system also compiles usage data for healthcare providers to improve treatment outcomes.

- **Relevance to DawaTrack:** DawaTrack's prescription and reminder system aligns closely with this patent, especially in providing medication compliance feedback.

Patent 3:

Title: Medication management system using cloud computing

Patent Number: US9877763B2

Country: United States

Granted On: January 30, 2018

Summary of Idea:

This patent describes a mobile-cloud integrated system that tracks medication schedules and stores prescriptions. It supports user login, data syncing across devices, and sends dosage notifications.

- **Relevance to DawaTrack:** This aligns well with DawaTrack's backend architecture using Supabase and cloud database for prescription tracking and reminders.

2. What are the key sections included in the patent draft?

Key Sections Included in a Patent Draft

A patent document typically consists of the following sections:

Section	Purpose
Title of Invention	A clear and concise title describing the invention.
Abstract	A brief summary of the invention, typically no more than 150 words.
Background	Describes the problem and existing solutions (prior art).
Summary of Invention	An overview of how the invention solves the problem.
Detailed Description	A thorough explanation of the invention, components, and working.
Claims	Legal definitions of the scope of protection the patent seeks.
Drawings/Diagrams	Visual illustrations of the invention, if necessary.
Field of Invention	Defines the technical area or industry the invention relates to.
Advantages of Invention	Optional section highlighting benefits over prior art.
